About BreakFree Education

Our mission is to radically improve education in the juvenile and criminal justice system by investing in the potential and dignity of all its students.

We partner directly with juvenile justice agencies across the country, providing the resources, training, and networks they need to make school relevant and meaningful.

We develop quality educational programs that inspire and engage students held in confinement and get them excited about their education.

We work with policymakers to shape the world we want to see – one where our young people have the education and support needed to reach their full potential.

The Olympus Times

Chick-Fil-A Shenanigans

By Danny G., Food Reporter

A virus at a local farm is killing not plants' only source of eggs and chickens, starting a rampage yesterday at Chick-Fil-A due to a shortage of meat. Our angry Olympus team took bats to the workers and smashed all the drive thru menu screens. There are three people injured and one pronounced dead early this morning, but specifics are yet to be released. The rampage lasted three hours, leaving the Chick-Fil-A destroyed.

This random virus has left farms completely intoxicated. All the animal deaths have made the sickness worse. The hope is to get past this within the next two weeks by isolating the animals. Lots of volunteers have helped remove the bodies and demand hygiene products to the local farmers.

The plan is to give the remaining sources of meat left delivered out to Chick-Fil-A once everything is back in business. Prayers are being sent to those affected by this tragedy.

If you want to learn more about this recent virus call or text MARSFOOD.

With this growth other things have increased including crime and corruption, along with other problems. Murder has risen to over 65 people per 100,000, 30 years ago, it was just over three people per 100,000. That is nearly a 16 person differential.

Many of you know that Insurrection Day is around the corner. I personally voted for Insurrection Day almost 43 years ago, but I am the first to admit it has gotten out of control. 43 years ago it was a 14 hour day of murder, theft and more, but it was controlled and contained.

People of Olympus Mills, do you think we need a form of government? I personally think we need a government, the anarchy here is getting worse and worse everyday. We settled here on Mars around 200 years ago. Since then, our population has grown to 4.6 million people, that's way bigger than the laws that first came here.

Nine, Insurrection Day is rising to over 36 hours and people are starting to get out of the limits. We need law enforcement to keep it contained and controlled and weigh it back in to 14 hours. Insurrection Day is supposed to let people handle their anger and control population. Establishing a military or police force will help keep this holiday in check.

Another thing the police force can help control is the corruption. A nefarious doctor is running our mines and neighborhoods everyday with the drugs he is making and selling illegally. If we were able to establish a strong government then we could have military, police force, and court systems. We need to hold people accountable for their violations, and that begins with forming a government. This change needs to happen as soon as possible!

Insurrection Day Incoming!

By Juan A., Crime Reporter

Attention Community of Olympus Mills, Insurrection Day is around the corner. Get ready for the action! Are you ready to defend yourself from bandits and robbers? It is no less than a days under the Big Dome.

You can get ready for this by making sure your home is secure. Prices are up right now for self-defense equipment. Get it while you can. You can also get ready by boarding up your windows, your doors, and your barns if you have them.

Insurrection Day has been getting longer and longer each year. So make sure to stock up on food. There is no telling how long it will be this year. So stay safe, don't go hungry, and tell your kids to be safe.

For the people participating in Insurrection Day, the Olympus Times wishes you to stay safe and stay frosty.

Meek Mill to Perform on Mars

By Dan G., Entertainment Reporter

Today, Meek Mill announced he will be visiting Mars to perform a concert for sick children. He says that he wants to help the kids by giving them cure that were discovered on Earth while giving them entertainment.

The concert will take place on top of the Olympus Mills. This show will not only be for the sick kids but it is also for every body on planet Mars. When asked what are his other plans he said, "I'm trying to help everybody in need, I want to make a difference. This place also known as Mars is slowly becoming new and improved. It is going to be home for all. This is us preserving the tenters human. Let us make this one count."

Meek Mill is a rapper from Philadelphia, PA. Meek Mill got his recognition for his freestyle rapping and later uploading his consciousness to the world's first rap bot. Some people know him by the song "Dream and Nightmares" which some refer to as the Philly's National Anthem.

C37 Oxygen Supersale

By Nate W., Business Reporter

This Friday there is going to be this oxygen sales event at 3:06 PM. There will be free gift baskets and a free supply of oxygen for six months. This will help life on Mars be more efficient. This grand opening for C37 Oxygen Tanks. So the people on Mars can breath better. But, this type of oxygen is only for outside use. This will be a significant change in our space suits and in our homes. The cost of the C37 Oxygen Tanks will be very expensive. The price for one tank will be 390 thousand Mars rocks. There will be several different deals available. The first deal we provide is buy one get two free. The second deal is buy three and get three free. The third deal is buy five and get to free refills. Refills for the Mars home tanks will cost 90 thousand Mars rocks. This deal is not for everyone on Mars, this is only for the richest Marians. This offer won't last forever, supplies are limited, act now! Poor people will suffer and die because they won't be able to afford C37 Oxygen.
